

# CTI PRODUCT EVALUATION PACKAGE

## SAP® PROCESS INTEGRATION

Knowledge, experience and  
ambition for practical solutions

# You would like...

- ... to teach basic knowledge in SAP® Process Integration to all decision makers and project participants?  
However, standard training is too general for you?
- ... to find out whether the integration usage you would like are realisable and affordable?
- ... a functioning integration prototype tailored to your requirements, which makes the benefits of this technology transparent to your company?

... and all this compactly,  
completely, quickly and  
results-orientated?

## The CTI Process Integration Evaluation Package

Three full days' training, workshop, prototype modelling and presentation.

# Agenda

## Day I

### Kick Off

Determination of the program and definition of the goals  
Participants: Management committee, selected project employees

### Overview Training

Teach basic SAP® Process Integration knowledge  
Participants: Project employees

## Day II

### Workshop

Drawing up, evaluation and costing of potential areas where SAP® Process Integration could be used.  
Participants: Selected project employees

## Day III

### Prototype modelling

Preparation of a functioning integration prototype  
Participants: Selected project employees

### Presentation / Discussion

Presentation of the exemplary solution and discussion of the requirements determined as well as their evaluation  
Participants: Management committee, selected project employees

SAP® und SAP® Process Integration are registered trade names of SAP AG. All other trade names are registered brands of the respective manufacturers.
